Business was much improved on the exchange today. The shares sold represented a value of almost \$10,000. Some nine stocks participated and with the exaception of May Day an upward movement was noticeable.

Daly headed the list with the sale of 200 shares at from \$1.33 to \$1.35 per share. This was followed by Daly West which recorded its first sale at \$18.21. It failed to hold its own, however, but re-ceded to \$18.15, from which figure it advanced to \$18.16% on the closing sale. Galena made a sale at 8%, and was followed by Geyser Marion at 1/2 a cent

May Day was very active but it rapid ly declined from its opening price of 40 cents per share. The last sale was made at 38 flat and it closed by offering stock at that figure, which no one cared

Mercur records another advance. It sold today at \$5.94. Star Con, was also stronger, as was Yankee Con, which advanced from 14% to 16%, closing with that price of-

fered and 18 asked. Over 8,000 shares of stock changed hands during call.

Joe Bowers was traded in at 1%. Sacramento is growing weaker, as is Grand Central, which was held at \$5.30 today with \$5.15 bid, losing quotations were posted as fol-

RETURNS FROM TINTIC DISTRICT

Sales on Exchange Today Amount J. H. Stahlings Talks of the Joe Bowers, Tesora and May Day.

THE CENTENNIAL REPORT.

Boston News Bureau Refers to it-West Mountain-Big Mining Beal -Yankee Con. Strike.

J. H. Stahlings came in last evening from Tintle district, after spending nearly two weeks in looking over the camps. As compared with two years ago Mr. Stahlings reports much quietness in mining operations. This is especially true of Silver City and Diamond. In spite of this fact, however, Mr. Stahlings brings very encouraging said to be much improved. The ore which was recently encountered in an upriase from the 400 level is identical in appearance, Mr. Stahlings says, with that which he shipped years ago. It is that which he shipped years ago. It is said to be as fine a lead ore as that mined anywhere in the State. A carload is on the way to market and 2 or 3 more carloads are promised shortly.

The fact that the ore has been found only twenty or forty feet below the 300 one of the boys began striking about level would seem to show that it does with a pick, when with a crash the bot-not exist in large quantity, but Mr. Stahl- tom of the depression disappeared, ex-

said that the mine had improved 50 per cent in the past two weeks.

Mr. Stahlings also visited the May Day, the stock of which is showing such strong declines at present. On the whole he reports the mine looking very encouraging, While he was there the mine ers broke into a fine body of lead ore, similar in grade to the best ore of the similar in grade to the best ore of the similar in grade to the best ore of the similar in grade to the best ore of the similar in grade to the best ore of the same and a party is on the ground today.

There are traditions of the and and a party is on the ground today.

There are traditions of rich mines in those bills, that were once worked by the early Spanish exploration of the and and a party is on the ground today.

There are traditions of rich mines in those bills, that were once worked by the early Spanish explorers, but which had to be abandoned on account of the hostility of the Indians. The boys think that they have found one of these. The strong declines at present. On the whole he reports the mine looking very encouraging, While he was there the miners broke into a fine body of lead ore, similar in grade to the best ore of the Uncle Sam. Mr. Stahlings estimated that there was five or six feet of this ore in the strike. The ground is considerably broken, but some nice clean ore is being extracted and it is very probable that increased depth will prove the May Day to contain more merit than some people suppose. Mr. Stahlings looks for the stock to make sharp advances in the near fature.

those bills, that were once worked by the early Spanish explorers, but which had to be abandoned on account of the hostility of the Indians. The boys think that they have found one of these. The News hopes that their fondest anticipations may be realized.

Activity in Arizona.

At no time within the history of Arizona has there been as great activity in mining circles as during the last year and at present, says an Arizona paper. In this connection the surveyor generadvances in the near future.

THE CENTENNIAL REPORT. The Boston News Bureau Furnishes a Number of Details.

It will be remembered that a statement was recently given out from the office of the Centennial-Eureka Mining company which showed that during the first six months of this year the com-pany had received \$722,655 from the diver, gold and copper of the ores marketed in that period.

The latest issue of the Boston News

Bureau endeavors to enlighten the pub-lic on the details of the report by assuming that the company kept its consuming that the company kept its con-tract with the Smelling company which calls for 100 tons of ore per day. In the records of the district it is shown that \$20 cars of ore were shipped from the mine in the past six months. Assuming that each car contains twenty tons of ore the shipments are shown to amount to 20,500 tons, which is cut down to 20,000 tons after allowing for moistur. The statement that 1,148,455 pounds copper was marketed at 16½ cents per pound is disputed. The price paid to the company is placed at 12 cents per pound. Owing to 1.3 per cent being de-ducted for assays it is stated that 520. 000 pounds of copper is not paid for. The returns on the balance of the total production, or 628,455 pounds at 12 cents per pound is placed at \$75.414. The val-ue of the gold is placed at \$277,933 and the value of the silver is estimated at 57 instead of 60 cents and foots up to \$219,243. Thus the total value of the ore produced is shown to be \$572,590 instead of \$722,655.

The smelting, freight, sampling and The smelting, freight, sampling and assay charges are estimated at not less than \$13.50 per ton or \$270,000, which leaves an available balance of \$302.590, Of this amount \$200,000 was paid in dividends, which leaves, the News Bureau says, \$102.590 to pay for the expenses of mining the ore and the improvements made in the past gix

YANKEE CON. STRIKE. The Assay Values Causes No Little Excitement in Eureka.

Special Correspondence,
Eureka, Aug. 27.—There is quite an excitement in Eureka today over a big strike in the Yankee Consolidated, and a trip to the property proves it to be of no little magintude. Average assays from a three-foot vein broken into yesterday show values of 50 per cent lead, 32 ounces in silver and \$10 in gold per ton. The Yankee is situated between the Humbug and May Day, both producers, and its side lines adjoin each of them. Last fall a small strike was made by the Yankee people, but it proved to be on May Day ground, and after some little trouble the workmen were compelled to go back in their own side lines. Ever since then work has been pushed rapidly forward with every hope of cutting the May Day Vein. A Special Correspondence. hope of cutting the May Day Vein. A tunnel is being run into the mountain, which has reached a distance of 1,300 feet from its mouth. In an upraise at the end of this tunnel is where the ore

BIG MINING DEALS

Caswell Brothers Property on Thunder Mountain Bonded for \$100,000.

One of the most important mining deals ever consummated in this section was closed at 11 o'clock Saturday night, says the Boise Statesman. The transection involves the property of the Caswell brothers on Thunder mountain, the other party to the deal being Colonel W. H. Dewey. The colonel was represented by his son, E. H. Dewey, in the negotiations, while the promoter of the sale was E. W. Johnson, proprietor of the Overland hotel. Mr. Johnson has been at work on the matter ever alone it becames apparent that the West since it became apparent that the Meritt deal for the property would fall

Colonel Dewey agrees to pay \$100,000 for the claims; he also agrees to con-struct a wagon road from the State wagon road in Bear Valley to the property, and to erect a mill at the mine. The terms of his contract are

mountain, including the two from which the Caswells have secured such rich results by placer mining. The other claims extending up the mountain overing a portion of the wonderful eposit.
The character of the Thunder Moun-

tain property is well understood the readers of The Statesman. T is practically a mountain of ore, esti-mated to run from \$10 to \$20 a ton in gold. Whether or not it can be propery termed a ledge has not been de-ermined, but it seems to be a great dyke of mineral-bearing rock.

Colonel Dewey will at once put a
force of men to work on the property.

He is sending an expert in the district to plan the development, and during the winter the claims will be exten-sively opened up. The development of this Thunder Mountain district is a matter of the very highest importance to the state in general, and to Bolse in particular. There is a great mineral particular. There is a great mineral territory, including an extensive area showing large ledges of copper ore that will be brought into prominence with the opening of the Thunder Mountain section. In fact, the development planned by Colonel Dewey at Thundre Mountain will lead to the opening up of that entire interior region. It is one of the richest sections of the State, and with the advent of capital will soon be a heavy producer.

FOUND AN OLD SHAFT.

Thought to be an Old Spanish Mine in Maricopa Mountains.

a heavy producer.

Considerable excitement is being manlfested over the discovery in the Mari-copa mountains, of what is thought to not exist in large quantity, but Mr.Stahlings is satisfied that the Joe Bowers is the making of a good mine, though it may need another shaft being put down and proper development to do it.

The Tesora is also improving. Ore running 50 per cent in copper and 30 to 40 ounces in silver is being extracted for shipment. The 300 and 375 levels are both said to be looking well. Superintendent Creighton is reported to have said that the mine had improved 50 per cent in the past two weeks.

Mr. Stahlings also visited the May

zone has there been as great activity in mining circles as during the last year and at present, says an Arizona paper, In this connection the surveyor general's office furnished some interesting figures which show plainer than any mount of writing just what Arizona is

The year in the surveyor general's of. fice ended July 1, and up to that time \$11,335 had been deposited to cover the doing the necessary office work incident previous, years combined. The year preceding \$3,945 was deposited, making baisnce in favor of last year of \$7,300. Probably the most striking showing. however, is in the number of surveys for patents made last year, numbering 408, a large and significant increase over the year previous when only 166 surveys

were made.

The surveyor general's office also used up last year the entire appropriation of \$10,000 for surveying purposes, which shows great activity.

Visits Bingham.

Messrs. O. P. Posey and H. G. Heffron returned last evening from Bingham, after inspecting the Bingham Copper & Gold company's property, with which Mr. Posey expresses himself well pleased. Mr. Posey expects to remain in Zion all winter, and if all goes well he anticipates starting up the new smelter early in December. President Coran, O. E. Weller and Duncan McVichie were expected to return to town from Bland, New Mexico, this afternoon.

West Mountain Placer.

Superintendent C. W. Watson expects that work will be resumed at the West Mountain Placer within the next two weeks. The water can be pumped out In about 36 hours, but Mr. Watson does not intend starting up until something is done to prevent the present trouble with the pump. It is an excellent pump. but it has one weak part, and that has caused all the trouble. Mr. Watson says the necessary parts for the pump are here and another start will shortly

MINING NOTES.

C. H. Brunner is expected here shortly from Nebraska.

The Conklin Sampler reported six cars of ore from Tintic today. The Ophir Hill was on the market to-

day with eight cars of concentrates. The Bullion-Beck of Eureka reached the market today with two care of ore. Four cars of ore were marketed today

by the Horn Silver Mining company of The Cygnet Mining company of Stockton reached the market today

with two cars of ore. The Mammoth of Tintic reached the market today with three cars of crude ore and three cars of concentrates.

The Taylor-Brunton Sampler reported ten cars of ore from Stockton, four from Frisco and two from Tintic today, The last shipment of ore from the Utah mine at Fish Springs assayed 45 per cent lead and 189.5 ounces in silver

Joe Dederich is back from Republic, Wash, and reports the new mill at the Republic Mining company's property practically completed.

F. H. Lathrop reports the new hoist orking smoothly at the Ophir of State. ne. The burleighs will be started in few days now that the new air comessor is in place.

Vernal Express: Leroy Colton came the first of the week from the Bro-ide. From him we learn that the strike the lower tunnel of the mine proved be permanent and that samples taker from it assay sixty-five per cent copper. The manager, Mr. Lawrence, is very enthusiastic over the outlook of the property. Preparations are being made blow in the smelter again about the

Butte Mining World: Anyone doubt. ing the existence of well defined veins filled with lead matter, running through the heart of the business center of Butte, should visit the lot on West roadway, where excavations are being ade for the erection of the new Miner allding. And we surmise that if Sensuch that he will porsecute the necessary development on the claims in advance of making payment for them.

The property secured by Colonel a shaft instead of in the erection of a label. Dewey embraces a group of ten or a palatial newspaper building.

SMALL LOSSES THE RULE. | era and feeders, 2.65@4.50; bulls, 2.50@

Wall Street Makes Few Changes and Does Little Business.

Closing Dull and Drooping-Live Stock Tends Downward-Produce Keeps Steady.

New York, Aug. 28.-Except for a slight strength in the Republic Steel stock and some pressure against Reading first preferred, there was no feature worthy of notice today in the opening stock exchange dealings. Small losses were the rule. Sugar rallled 1/2 in the first five minutes after opening down a shade. Sugar was sold down almost a point after its early improvement and and steel hoop preferred 14 very sud-denly. Support then developed in var-lous spots, Brooklyn transit rallying a oint and sugar rising from last night' Prices moved very stuggishly during the second hour. The tone generally the second hour. the second hour. The tone generall, was firmer, strength in Brooklyn tran sit and People's gas alding the market. The closing was dull and drooping at

... A CHANCE FOR SCHOOL BOYS AND GIRLS ...

HE reports of the census enumerators of this city are now in Wash.

ington. In a short time the figures will be announced. To stimu-

late interest among our school boys and school girls in the sub-

ject, the Descret News has decided to offer ONE STANDARD DIC-

TIONARY, value \$12.00, to the boy or girl who first guesses nearest the

correct figures. The only conditions are that each guesser shall have

been enrolled in some one of the schools, or colleges of Salt Lake, or at

the Utah University during the year just past, and that each shall be

limited to one guess. In case of a tie, the ownership of the dictionary

shall be settled by lot. The guesses will be recorded daily, in the order in

which they are received. The "News" has arranged to receive the fig-

ures by wire from the census office in Washington as soon as they are

known, and the first guess received, coming nearest the correct figures

will be awarded the prize. No guesses will be recorded except those reg-

ularly filled out on the guess coupon below. Cut it out and send it with

your name, your address, the school you attended and the figures,

Why! Of course you have heard α Why! Of course you have heard of the Burlington, Everybody has, never, theless you will be surprised when you see the train, it's a wonder, and that dinner is immense, the meals cannot be excelled, the neatness of the napery courteous waiters, cleanliness and service in general are appetizers. The improvements in track have made the Burlington almost noiseless. You can sleep in a sleeper, dine in a diner, smoke in a smoker, read in a library car and recline in a reclining chair car all under one roof. And to make this whole train go the Burlington have the largest engines in the West. They are as high as a house, as fast as a whirlwind, and weigh 114 tons each. You should go over this road to see and ride behind one of those monsters.

one of those monsters.
